# Assessment #2 – Page Creation

Please turn this JPG image into responsive web page. The HTML should look fine in all major browsers, as well as responsive down to 320px. Please only create the sections shown below:

Specifications:

- The font family is Montserrat
- The font color of the headings is #203B6A
- Make sure the recreation is done being as faithful to the original as you possibly can. If you can insert an icon using glyphicon or font-awesome, for example, but that icon is not exactly the one shown on the source file, do not use that icon but use the original instead. Pretend you are creating this page for a customer and are attempting to match their specifications as close as possible.
